

CSS Animation

Syntax

```
/* Standard syntax */  
@keyframes example {  
  from {background-color: red;}  
  to {background-color: yellow;}  
}
```

```
div {  
  animation-name: example;  
  width: 100px;  
  height: 100px;  
  background-color: red;  
  animation-duration: 4s;  
}
```

CSS Animation properties

Property	Description
@keyframes	Specifies the animation code
animation	A shorthand property for setting all the animation properties
animation-delay	Specifies a delay for the start of an animation
animation-direction	Specifies whether an animation should be played forwards, backwards or in alternate cycles
animation-duration	Specifies how long time an animation should take to complete one cycle
animation-fill-mode	Specifies a style for the element when the animation is not playing (before it starts, after it ends, or both)
animation-iteration-count	Specifies the number of times an animation should be played
animation-name	Specifies the name of the @keyframes animation
animation-play-state	Specifies whether the animation is running or paused
animation-timing-function	Specifies the speed curve of the animation
